

## DESIGN | MANUFACTURE | INSTALL | COMMISSION

At Brookvent we understand that building a new home or carrying out renovations is a major commitment. We were engaged by our Self Build client to provide the ventilation solution for a new build on the outskirts of Portadown in Co. Armagh. The home is situated in a peaceful rural setting with neighbouring orchards and magnificent views over the surrounding countryside.

Our client is the principal in a local Architect's firm and, having built his own home to the highest standard, wanted to have the most efficient Mechanical Ventilation Heat Recovery (MVHR) unit installed to augment this standard and provide a healthier living environment through a low energy, low carbon ventilation system.

“

**Everything was well worked out before hand and installation went really well. No issues with the system at all – no stale air, home feels fresh and no build-up of steam or condensation. Happy to recommend BROOKVENT and have also specified the heat recovery unit a couple of times as part of my Architect's practice.**
